

Hi, I wish to comment on the attempt by the National Association of Broadcasters to limit XM satellite radio's attempts to broadcast traffic and weather information to various locales. It is apparent that the reason that I have decided to pay for radio service rather than using the free airwaves is because I believe that XM provides a quality product as compared to the inferior products of radio stations that NAB is backing. I request that you stop protecting the NAB affiliates and let them compete on a level playing field with a dynamic new company that is trying to break into the broadcasting business and improve it for the public listener.

Thank you,

Mike Mungiole
